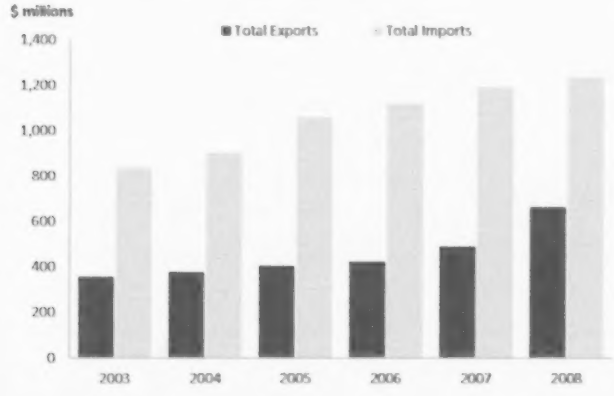
Total Yukon Exports and Imports
(millions of current dollars)



Between 2003 and 2008, the vast majority of Yukon-produced goods and services were consumed within Yukon. Since 2003, the value of goods and services exported has increased each year, from $355.0 million in 2003, to $664.7 million in 2008.

Between 2003 and 2007, the value of Yukon's exports remained between 14% and 16% of the value of all goods and services produced. This percentage climbed to 19.1% in 2008.

In 2003 and 2004, inter-provincial exports remained relatively steady at about $190 million. Since 2004, inter-provincial exports have increased dramatically each year to over $322.5 million in 2008.

Notably, international exports from Yukon took a large jump in 2008, increasing by 80% to $342.2 million from 2007. The large increase in 2008 can be attributed to an increase in exports of minerals (e.g. Minto mine).
